EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims

In claim 25: line 1, "14" has been replaced with – 24 –, since this was clearly intended.

Fully amended text is given below:

25. (Currently Amended) The projector according to claim ~~[[14]]~~ 24, the bias member of the optical modulation device retainer including an engagement section that engages with an optical element insertion side end part of one of the standing pieces, and a spring-like section formed at an end part of the engagement section extending outward, to bias the substrate of the optical conversion element by abutting to the substrate.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Best reference noted is Fujimori et al cited in PTO-892 attached herewith. Despite its similarity, the optical modulation device retainer of the patent fails to teach or fairly

suggest the light modulator fixing section, the extension section and the pair of standing pieces of the present invention. Further, the present device retainer does not have a cooling device therein, while that of the patent calls for one. In light of this difference, it is concluded that the two inventions contain divergent subject matters.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
